SUIT 101787

The classic and rich herringbone texture combined with mélange yarns gives SUIT a personality all of its own. The colour scale, with 27 options, is inspired by the elements: dry, bristly grass next to white sand on a windy beach; dark rocks meeting a frothy sea; and shades of warm sunset light. Technically, SUIT is a dimout that provides superior acoustic performance with an alpha value of 0.95, light exclusion above 99%, and the flexibility offered by its 3-metre width. SUIT complies with most FR standards, including IMO, and is OEKO-TEX certified.

The textured herringbone surface, combined with the broad, contemporary colour scale and 3 metre width, along with its outstanding acoustic performance with an alpha value of 0.95, make SUIT an excellent choice for various settings.
