

Five Zero Green

- Almedahls uses exclusively bio-fuel to power production equipment
Almedahls consumes electricity purely from certified green sources
- Almedahls recycles water via a closed circuit internal water purification facility which also recirculates heat
- The exhaust from the operations of Almedahls is purified and we are a net zero CO² contributor
- No harmful chemical ingredients are used and the chemical compliance of Almedahls goes beyond REACH
- At Almedahls we continuously monitor and reduce material waste in all areas of the value chain. For instance via a high quality level in production
