

Maskros 100180

**Maskros** created by Ingrid Backman, originally launched in 2005, is a true Almedahls design classic. The archetypal flower shape has a strong graphic appeal and the pattern has proven popular for all types of public spaces. This updated concept combines three design expressions in one collection. We have kept four original colour ways with white base and added some new with a coloured base, some with white flowers and some with multi-coloured.

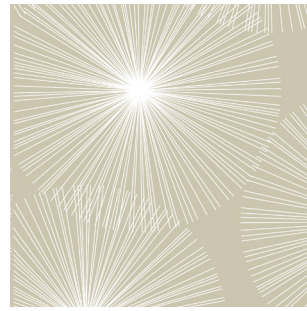

**We thought you'd like...**

- the colour concept presenting many combination possibilities
- the timeless design that fits into most public environments
- the textured fabric providing delicate filtering of the light
