

Panorama II 101695-0092

We have updated the colour range of our hugely popular Panorama with a large addition of versatile neutrals. The characteristics of Panorama are the subtle shimmering colour effects, which are created by using different colours in warp and weft. Panorama is the perfect translucent base fabric which provides separation whilst still letting light through, it is soft and drapes beautifully. To create intriguing soft tonal effects Panorama is also great to combine with our transparent fabric Shade which is 330 cm wide and has an equally broad colour palette.

We thought you'd like...

- the subtle, shimmering colour effect
- the 310 cm width which offers seamless hanging as a room divider or in front of large windows
- the wide colour range consisting of 44 nuances
