

Billow 101854

*Translucent, sound absorbing and colourful! In addition, the twill binding makes **Billow** incredibly soft providing a beautiful drape. The weave construction with three yarn colours creates an intriguing, slightly colour shifting surface which offers an easy way to use the fabric as a transition between other colours and materials in a room. Colours with a mixture of hues across the colour wheel as well as the tone-on-tone versions gives a broad palette of expressions to work with.*

*The palette is ranging from soft neutrals combined with modern, quirky pastels and some brave high contrasts. All inspired by the colours that can be found in our wonderful nature. The double-faced fabric with different tones on each side provides numerous options to use **Billow** creatively, as a room divider or as room in the room or layering as above. The possibilities are endless!*
