Panorama II 101695

We have updated the colour range of our hugely popular Panorama with a large addition of versatile neutrals. The defining characteristic of Panorama is the subtle shimmering colour effects, created by using different colours in the warp and weft. Panorama is the perfect translucent base fabric, offering separation while still allowing light to pass through. It is soft and drapes beautifully. To create intriguing soft tonal effects, Panorama also pairs well with our transparent fabric Shade, which is 330 cm wide and features an equally broad colour palette.

The subtle, shimmering colour effect, the 310 cm width that ensures seamless hanging as a room divider or in front of large windows, and the wide colour range consisting of 44 nuances make Panorama a versatile and elegant choice.
