

Topography L 101594-0069

*Topography L is a part of the **Lines of Illusion** concept created by leading architects. Topography L has a bold scale and can be combined with the smaller pattern version Topography S and adds a dynamic element to any room. The inspiration for the pattern comes from topographic maps where level differences in the terrain are depicted using level curves. The curves have been re-interpreted into undulating diagonals and a thin contour line in a contrasting colour has been added creating a lively expression with a subtle 3D effect.*

We thought you'd like...

- the possibility to combine with the small scaled pattern **Topography S** in co-ordinated colours
- the bold design expression and graphic simplicity of the design
- the new dense base fabric with a rib weave effect
