

Rist 101398 - 0043

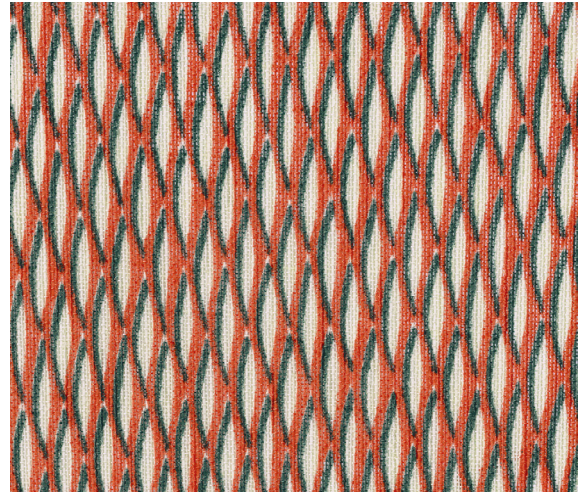

Rist is an interpretation of stretch metal often used in architecture, created by masterly surface designer Ulla Gustavsson. The hard, industrial structure transforms and becomes softened when printed on a delicate, transparent fabric. The two-coloured print creates an interesting depth to the texture. The small scale makes it easy to coordinate Rist with our uni fabrics and larger prints. Rist is printed on a 100% recycled fabric made from PET-bottles.
