# CIRCLEEASE 101880

CIRCLE is a sustainable fabric concept made of fully circular copolyester, with Ocean Safe technology certified with Cradle to Cradle Gold. The benefits in short is that it is free of toxins and biodegradable, and leaves no microplastics behind. The manufacturing of the Circle fibre requires significantly fewer steps, less energy and less water consumption. At end of life the fabrics will be composted and recycled into new fibres through an established take back system.

CIRCLEEASE in an airy sheer with a breezy movement. A modest plain with a matte, milky surface. The gentle, light filtering properties creates a relaxed atmosphere transmitting and elevating the incoming light in a beautiful way. The fabric is piece dyed making it uniform in colour and bringing an unpretentious, minimalistic expression. The pared back colour palette has taken inspiration from the elements; the sky, water, sand and rock. It is flexible and easy to adapt to most environments both in front of a window and as a light room divider subtly diffusing the surroundings.
