Why choose Creative Rugs

Creative Rugs from Almedahls offer tailored solutions for every project. Whether you prioritise tactility, durability, or aesthetic appeal, our rugs are designed to meet the needs of public and commercial spaces.

Customisation:

Tailor size, shape, colour, and material to fit your project.

Functionality:

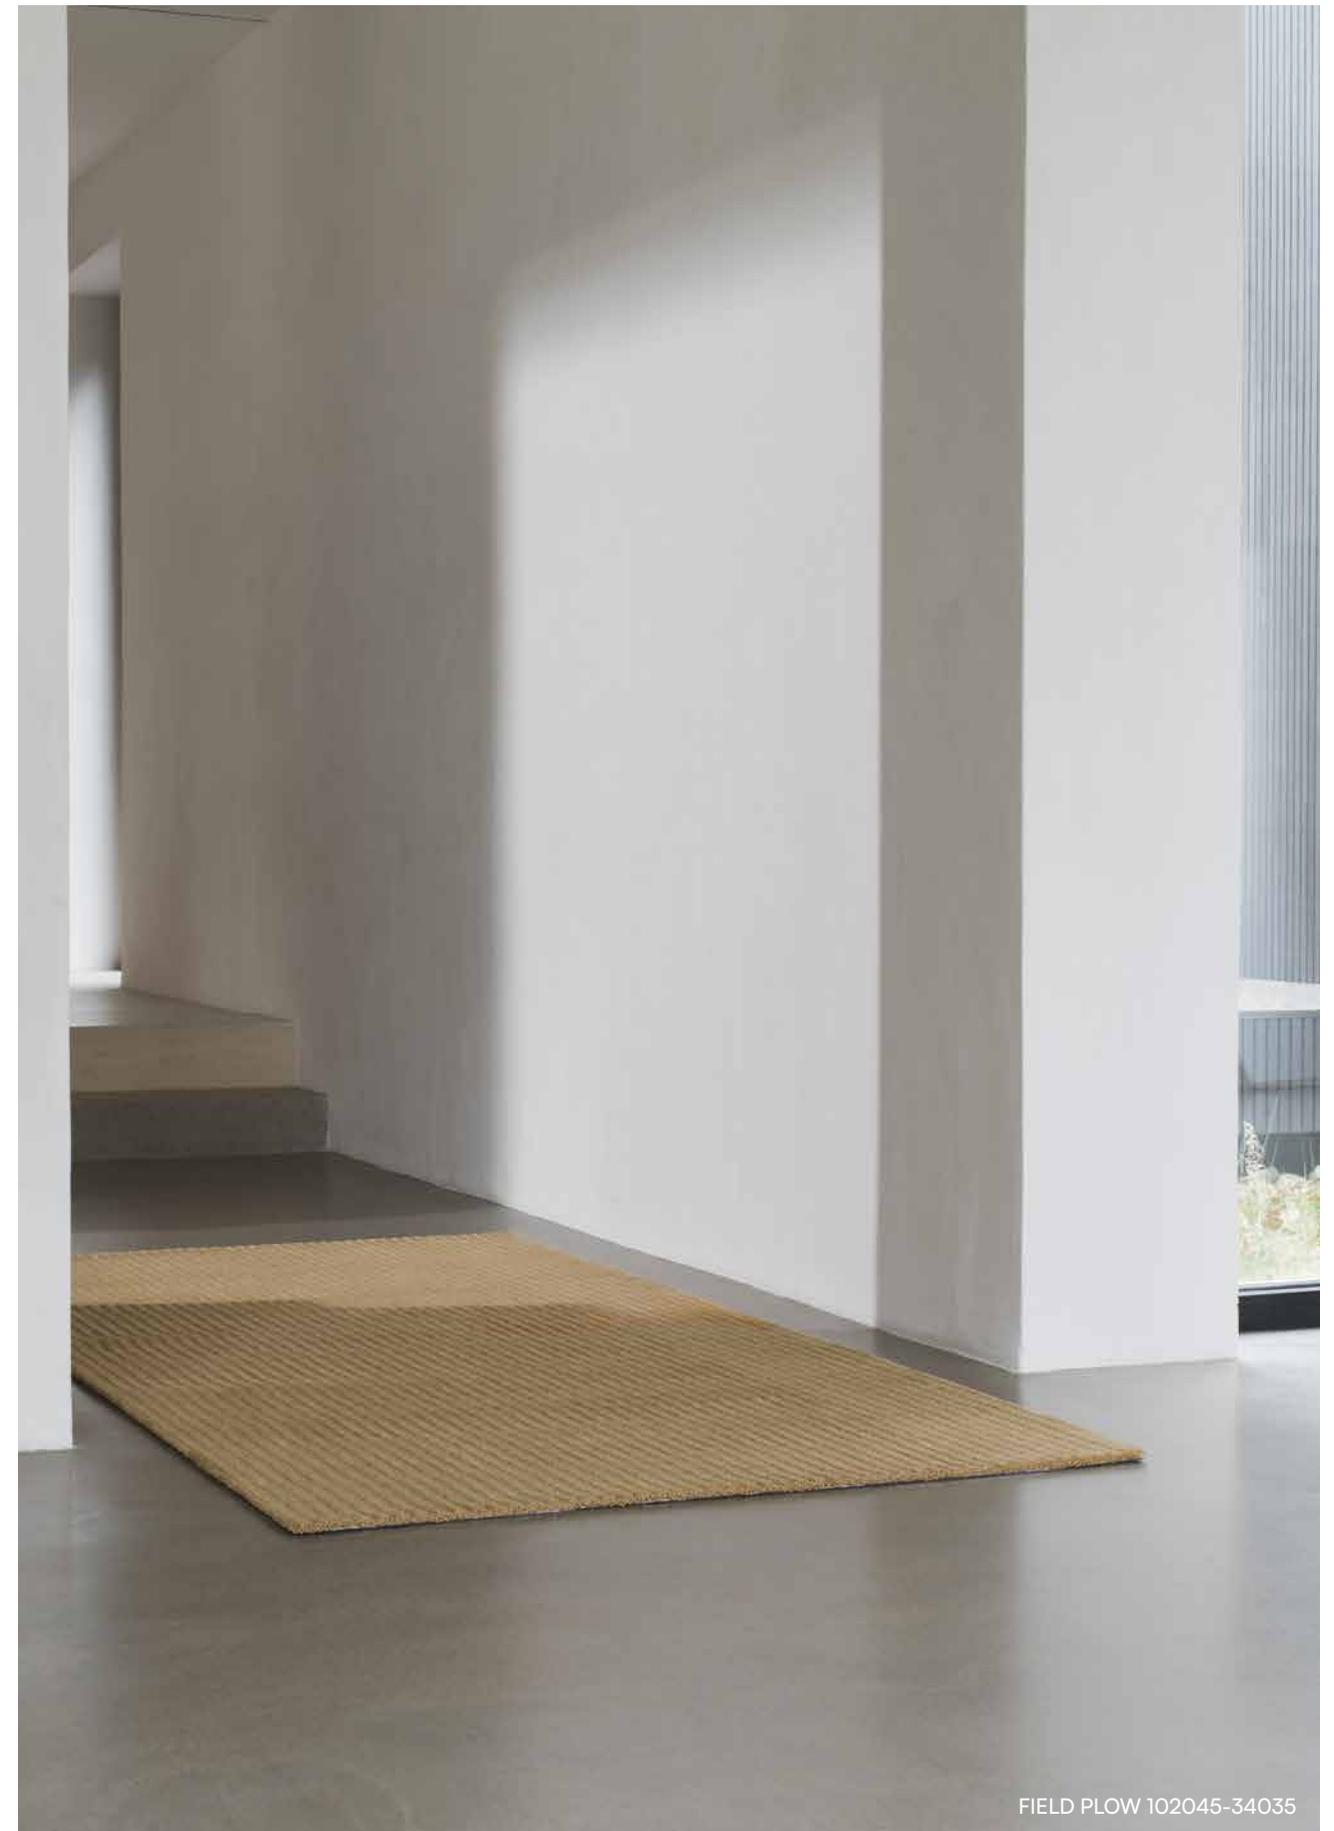

Durable, sound-absorbing, and naturally flame-retardant.

Tactility:

From soft textures to dynamic 3D effects to engage both the eye and the touch.

Design versatility:

A comprehensive colour range and multiple techniques for endless creativity.

FIELD PLOW 102045-34035

How to choose the perfect rug

1. Define the purpose

Consider what you want the rug to achieve. It can enhance the aesthetics of a space with colour, pattern, and texture or serve a functional role, such as providing fire retardancy, reducing noise, or adding softness. Rugs can also trap dust, insulate, or define areas within a room.

2. Consider traffic and placement

Traffic is key when choosing a rug. High-traffic areas, such as entrances, require durable rugs that can withstand wear and tear. Placement also matters, as some areas face more exposure than others, which should guide your material choice.

3. Material and construction

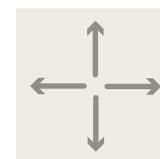

For frequent and high-traffic areas, we recommend low-pile wool rugs with high tuft density. Hardtwist wool adds extra durability. Moderate-traffic spaces allow for softer materials and mixed yarns in low or medium piles. For light-traffic areas, luxurious long-pile rya rugs offer a soft, indulgent feel.

4. Design and colour

Patterns and colours help define zones, set a mood, or create contrast. Match the room's theme or use bold tones for impact.

5. Size and shape

Custom sizes and shapes are available, with dimensions up to 5.0 × 8.9 m.

Maximum size
5.0 × 8.9 m

Practical placement tips

Under tables: Leave 60–80 cm around the table for chair movement.

Lounge areas: Extend the rug beyond seating to frame the space and enhance openness.

Traffic level

Please refer to page 94 for an illustrative categorisation of rugs according to room type and traffic level.

Three ways to create your perfect rug

At Almedahls, we believe rugs should reflect your needs and style. Here are three ways to create a rug that fits your space perfectly:

1. Choose from our standard collection

Our curated standard range offers solutions for every need, from durable and practical to soft and atmospheric. Explore our predefined colours to find the perfect match.

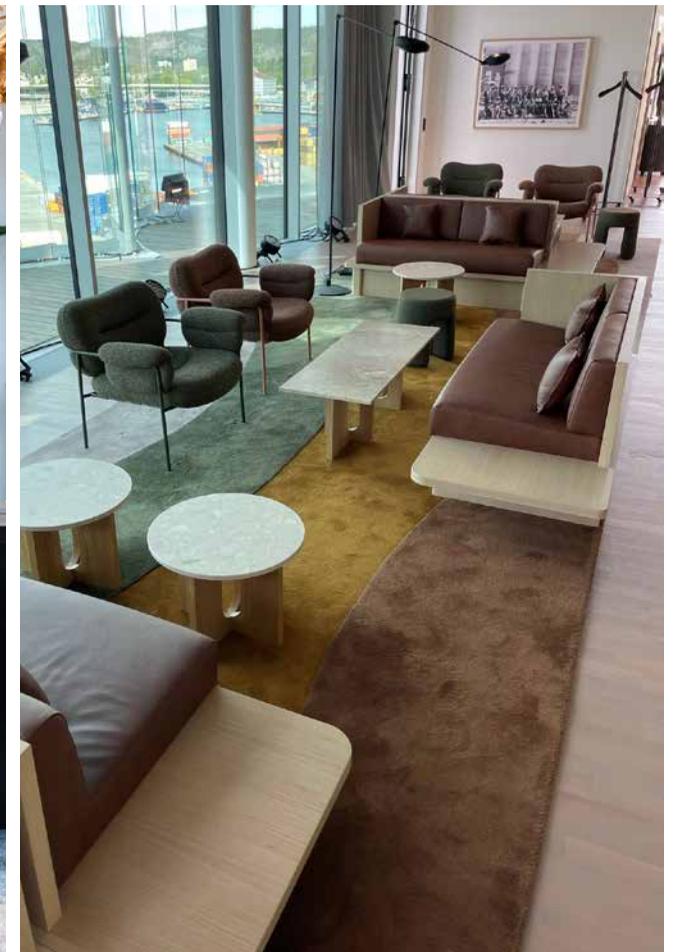

2. Customise a classic

Start with one of our standard rugs and make it yours. Experiment with colour combinations, shapes, or pile heights to add a personal touch.

3. Design from scratch

Have a vision of your dream rug? Whether inspired by art, text or a unique mix of shapes and textures, we'll help bring your idea to life.

No matter your approach, Creative Rugs from Almedahls ensure quality, craftsmanship and endless possibilities.

This rug showcases a curated selection of textures, qualities, and colours, while demonstrating the freedom to design a rug entirely tailored to your vision.

Our yarn qualities

Our yarns combine durability, quality and aesthetic versatility. From the velvet-like softness of Spirit to the natural shimmer of Tencel™, each material offers unique features that inspire design creativity.

Whether creating rugs for homes or public spaces, our yarns deliver beauty, function and tactility.

Linen

Wool Spirit

Wool Hardtwist

Vision

Tencel™

Wool Spirit

100% New Zealand Wool | 140 Colours

Wool is a fibre with numerous benefits: warmth, durability, natural flame retardancy and dirt repellency. Spirit is a soft, versatile yarn, ideal for solid colours, blends or patterned rugs. Its cut pile creates a smooth, velvety surface, perfect for carving relief patterns. A cut-and-loop blend adds a dynamic mélange effect.

Pile options: Cut Pile 14-20 mm, Loop pile 8-12 mm

Wool Hardtwist

100% New Zealand Wool | 70 Colours

Wool is a natural, renewable and biodegradable fibre with excellent insulating properties. It is durable, naturally flame-retardant and dirt-repellent. Hardtwist is a wool yarn with an additional twist that enhances durability. This twist gives the yarn a rich lustre and a surface with more defined texture compared to Spirit yarn, making it ideal for cut, loop and rya pile applications.

Pile options: Cut Pile 10-20 mm, Loop Pile 8-12 mm, Rya 25-75 mm

Vision

50% Wool, 50% Linen | 5 Colours

Vision is a mélange yarn crafted from a blend of wool and linen—two elegant natural fibres that together create a strong, durable mix. Its matte, coarse texture, combined with a tight twist, produces a distinctively textured surface full of character. Ideal for cut, loop and rya pile designs, Vision adds a unique and timeless aesthetic to any rug.

Pile options: Cut Pile 14-20 mm, Loop Pile 10-25 mm, Rya 25-75 mm

Linen

100% Linen | 20 Colours

Linen is a natural fibre derived from the flax plant. Its fine texture brings unique character to rugs, adding elegance and sophistication. Linen pairs beautifully with Hardtwist or Spirit yarns, offering versatility in both cut and loop pile designs. The long fibres create a natural lustre, enhancing visual depth and a refined finish.

Pile options: Cut Pile 10-20 mm, Loop Pile 8-12 mm, Rya 25-75 mm

Tencel™

100% Lyocell | 70 Colours

Tencel is a sustainable cellulose fibre made from wood sourced from FSC- or PEFC-certified plantations and forests. The yarn is coated with a dirt-repellent film, making rugs easier to keep clean. Due to the long fibres, shedding is reduced compared to other natural materials. The unique light reflection of the fibres creates a soft shimmer, adding luxurious elegance to any space.

Pile options: Cut Pile 12-16 mm, Loop Pile 10 mm

The techniques behind our rugs

Our rugs are crafted step by step, beginning with a base fabric where textile fibres are tufted to create distinct surfaces and textures.

There are four techniques to choose from, each offering a unique look and feel for your rug.

Loop Pile

Closed loops form a textured surface, which provides more light reflection and creates a bright appearance.

Cut Loop

Combining cut and loop creates a soft *mélange* effect and a more dynamic look, with just a single yarn colour.

Cut Pile

The cut yarn surface gives a velvety feel, rich colour tones, and works well for detailed patterns.

Rya technique

A variation of long and short threads creates depth and a vibrant, lush texture.

The colours of our Creative Rugs

The colours of our Creative Rugs reflect Almedahls' design philosophy: a harmony of creativity and function. Inspired by our Nordic heritage and global trends, our palette is crafted to bring your vision to life.

With up to 140 colours in Spirit wool quality, along with 70 options in both Tencel and Hardtwist, 20 in Linen, and 5 in Vision, our range spans from bold, vibrant tones to soft, natural hues. Mixed yarns expand the possibilities even further, creating unique blends, textures, and effects.

With these endless possibilities, you can design rugs that become striking focal points or seamlessly blend into any setting, perfectly reflecting your unique style.

How to select colours

To simplify your design process, we offer two flexible approaches:

1. Standard colours:

Carefully curated by our design team, these pre-selected palettes are tailored to each rug design. They ensure effortless colour matching and harmonise beautifully with diverse interiors, making it easy to create stunning rugs.

Shown as "Standard colours" in the table under each product description.

2. Create your own palette

Independently, or with support from our expert consultants, explore the full range of colours from our yarn palettes and select colours that perfectly match your vision.

Shown as "Total colours available" in the table under each product description.

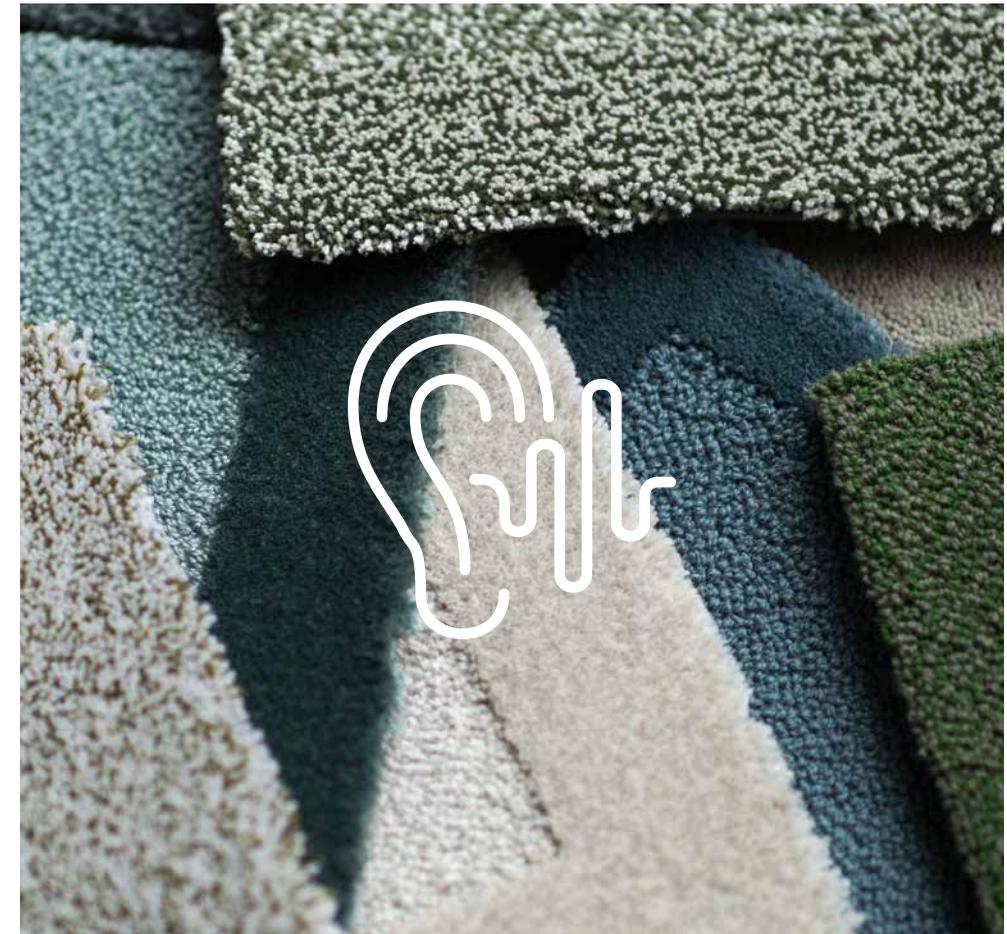

Backing

Once the front surface is tufted, a stabilising layer is applied to the back to secure the fibres and maintain the rug's shape. This layer provides structure and stability, while an anti-slip mesh keeps the rug firmly in place, preventing movement.

The finished rug is delivered with textile edgings, eliminating the need for edge overlock and increasing the lifespan of your Creative Rug.

The finished rug is delivered with textile edgings which eliminates the need for edge overlock, and increases the lifespan of your Creative Rug.

Rugs and acoustics

Rugs are essential for creating acoustically balanced spaces. Beyond their visual appeal, they are powerful tools for enhancing sound dynamics

Scientifically tested and ISO 354-certified, our rugs effectively absorb sound at voice frequencies, reducing echo and noise without distortion. With an alpha value of 0.55, they provide reliable acoustic performance, making them a smart choice for both residential and commercial interiors.

News 2025

Discover FIELD – A rug collection inspired by nature

Immerse yourself in the timeless beauty of rural landscapes with FIELD, a collection of rugs inspired by nature's organic patterns.

Designed with exceptional durability and tactile appeal, each of the three stripe designs — SOW, HARROW, and PLOW — brings natural elegance to both residential and commercial interiors.

The background

Celebrating agricultural heritage with a contemporary twist, the FIELD collection is inspired by the linear patterns left by machinery in the countryside. Crafted using cut and loop pile techniques, each design offers a distinct interplay of textures and depth.

Made from 100% New Zealand wool, FIELD rugs are soft, durable, and ideal for spaces with moderate to frequent traffic.

Explore the FIELD stripe patterns

Each of the three stripe patterns: SOW, HARROW, and PLOW offers a unique expression of texture and style. Discover their individual characteristics and find the perfect fit for your space.

SOW

The narrowest stripe in the FIELD collection, SOW alternates between loop and cut pile rows, evoking the sleek texture of corduroy. Ideal for a modern, refined interior.

Stripe composition: Loop: 0.5 cm | Cut: 0.5 cm

HARROW

HARROW combines narrow loop stripes with wider cut pile stripes to create a subtle pinstripe effect. Thin, light lines contrast against a darker background, lending understated elegance.

Stripe composition: Loop: 0.5 cm | Cut: 1 cm

PLOW

PLOW features bold block stripes with alternating rows of loop and cut pile. This striking design balances boldness and harmony, perfect for making a sophisticated statement.

Stripe composition: Loop: 1 cm | Cut: 1.5 cm

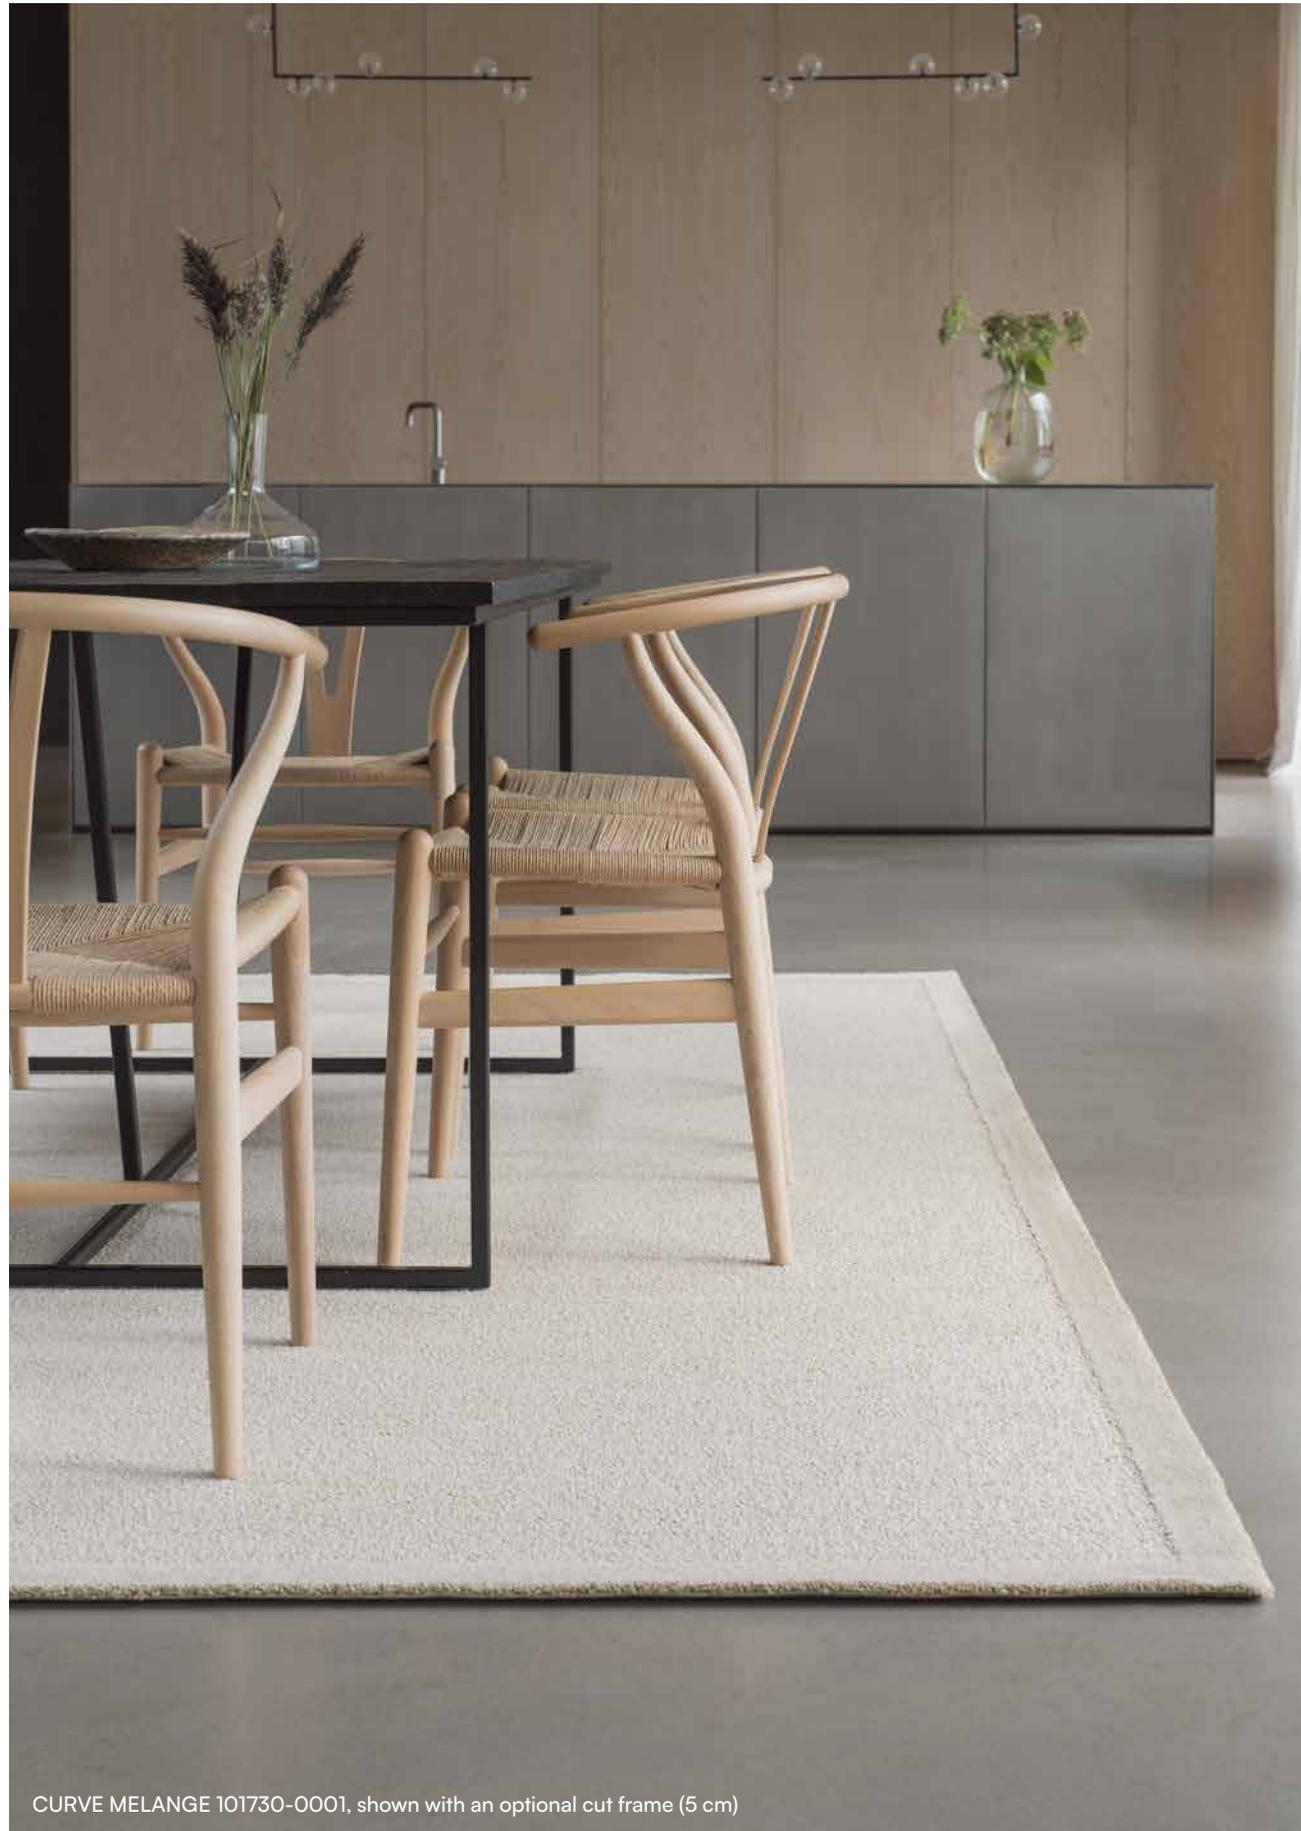

ROLLO PRO 102048-0077

-NEWS 2025-

Rollo Pro – Engineered for high-traffic areas

Designed for spaces with heavy foot traffic, ROLLO PRO combines durability with refined aesthetics. Its dense, low-pile surface ensures smooth movement for office chairs, while the cut-and-loop texture adds subtle depth. A reliable choice for high-demand environments like reception areas.

CURVE MELANGE 101730-0001, shown with an optional cut frame (5 cm)

-NEWS 2025-

Define your rug with a Frame

Elevate your rug design with our optional frames, available in three standard sizes for select rug styles. Designed for both residential and commercial spaces, these Frames add a stylish touch and a practical finish, ensuring durability and a polished, complete look for any setting.

Choose the perfect frame for your rug

Our frames are designed to elevate your rug, both visually and functionally. Whether you prefer a subtle loop pile finish or a bold cut pile border, there's a style to suit multiple rugs in our collection.

Loop frame

A soft, loop pile border that provides a harmonious and subtle finish. Perfect for those who prefer a seamless transition between rug and floor. With the loop frame, the border appears lighter than the centre of the rug, adding a delicate contrast to the design.

- **Available width options:** 2 cm
- **Available for standard products:** Plain, Grain, Glans, Candy, Shimmer II and Yta.
- **Important:** A cut pile rug can only have a loop frame.

Cut frame

A modern, cut pile border that delivers a distinct and sophisticated look. Ideal for creating a more pronounced contrast. With the cut frame, the border appears darker than the centre of the rug, enhancing the depth and character of the design.

- **Available width options:** 2 cm or 5 cm
- **Available for standard products:** Plain, Grain, Glans, Curve and Curve Melange.
- **Important:** A loop pile rug can only have a cut frame.

Match your rug and frame effortlessly

On each standard product page, you'll find detailed information about frames compatible with your chosen rug.

How to choose your frame

- Start by selecting your desired rug quality.
- Next, choose a frame that highlights both the material and design.
- Need advice? We're here to guide you in finding the ideal combination.

MonoBlend standard products

Rugs with subtle tonal variations
and a uniform, harmonious look.

CANDY 100273

CANDY

CANDY combines Spirit with Hardtwist in a cut pile technique, creating a dense and durable rug. The interplay between Spirit and Hardtwist, along with the option to use two colours, results in a softly muted, hazy surface that transforms into a dynamic and captivating colour expression.

CANDY offers the luxurious depth of wool fibres, blending richness and purity in a timeless design suitable for frequent traffic areas.

CURVE 101729-0014

CURVE

CURVE is a low-pile rug (8 mm) in a base colour, enriched with irregular threads in matching tones to create a dynamic sense of motion. The loop technique and low pile make CURVE a versatile and durable choice, suitable for frequent traffic areas.

Crafted from Spirit wool yarn, CURVE exudes the authentic feel of true textile craftsmanship and natural origin.

GLANS 101561-80189

GLANS

GLANS is crafted from 100% Tencel™ fibre, giving it a radiant and luminous character. With three pile heights and options for both cut and loop techniques, GLANS offers a variety of expressions to suit your space.

Thanks to its unique light-reflecting properties, GLANS subtly enhances your furnishings, almost illuminating them from beneath. It frames your décor with elegance, adding a touch of refined glamour to any setting.

GRAIN 100710-0084, shown with an optional cut frame (2 cm)

GRAIN

GRAIN is a sibling of PLAIN. Both GRAIN and PLAIN are uni-colour rugs with a surprisingly wide range of expressions. The fibre base of GRAIN features Hardtwist, available in 70 colours.

GRAIN is offered in both loop and cut pile, with pile heights of 10, 14, and 25 mm. Its durable construction makes it a truly versatile rug, suitable for any space, including high traffic areas, depending on the chosen pile height and technique.

PLAIN

PLAIN is a sibling of GRAIN. Both PLAIN and GRAIN are uni-colour rugs with a surprising number of expressions. The character of PLAIN is shaped by Spirit wool yarn, available in 140 colours. Three pile heights (10, 12, and 14 mm) provide versatile placement options, making it suitable for a wide range of spaces depending on the chosen pile height.

The loop technique allows light to reflect more effectively, as the sides of the yarn are visible, creating a brighter appearance compared to cut pile. Cut pile, on the other hand, showcases deeper colours due to the way light interacts with the cross-section of the yarn.

ROLLO 100287

ROLLO

ROLLO is designed to provide a beautiful yet resilient textile surface, ideal for spaces with frequent traffic and office environments.

Its dense structure is achieved with an 8 mm combination of loop and cut pile, made from Spirit wool yarn. This technique enhances the rug's subtle melange effect, adding depth and radiance. The low pile allows for smooth movement of office chairs, making ROLLO a practical choice for workplaces.

Choose from 140 colours in the Spirit colour box to find the perfect shade for your space.

ROLLO PRO 102048-0032

ROLLO PRO

ROLLO PRO is the robust sibling of ROLLO, designed with Hardtwist wool yarn for enhanced durability. Built to withstand heavy traffic, it is ideal for demanding environments such as reception areas.

Its low-pile, dense surface allows for smooth office chair movement, while the cut and loop technique creates a soft, two-toned effect. A non-slip backing ensures the rug stays securely in place.

Available in 70 colours, ROLLO PRO seamlessly combines functionality and elegance.

SHIMMER II 102044-0006

SHIMMER II

SHIMMER II blends the luminous quality of Tencel™ with the matte texture of Spirit wool yarn, resulting in a captivating surface that shifts character with the angle of the light and offers a silky smooth feel. For added depth, SHIMMER II allows for a playful interaction of light and colour by combining two tones.

Available in 10 mm cut pile and a palette of 25 standard shades, SHIMMER II is suitable for moderate and lower traffic levels, making it ideal for spaces where softness and elegance take centre stage.

WAY 100292-00665

WAY

by Professor Josef Frank

The bold design of WAY by Professor Josef Frank combines geometric and organic shapes, making it a striking addition to public spaces. With its captivating pattern, WAY not only draws the eye but also guides movement through a room, visually and physically. Crafted from Spirit wool yarn, it offers a balance of durability and timeless elegance.

Care instructions

Crafted for durability and timeless beauty, our rugs are built to last, even in high-traffic areas. Follow these simple care steps to maintain their quality over the years.

1. Vacuum regularly

Frequent vacuuming removes dirt and helps maintain the rug's appearance. During the initial period, vacuum more often to eliminate excess fibres caused by natural shedding.

2. Remove stains promptly

Act quickly to absorb spills using a dry cloth. For stubborn stains, use lukewarm water if necessary, working from the edge toward the centre to prevent spreading. For dry dirt, gently use a spoon, knife blade, or vacuum cleaner.

3. Follow cleaning guidelines

Engage professional carpet cleaning when required and always follow our provided care recommendations.

4. Rotate placement (if applicable)

Occasionally adjust the carpet's position in rooms with movable furniture to ensure even wear over time.

Practical benefits of wool for public spaces

- **Elasticity:** Wool fibres recover easily from pressure marks left by furniture when gently brushed back.
- **Durability:** Wool is naturally dirt-repellent and flame-resistant, enhancing safety and longevity.
- **Extended lifespan:** Applying a textile protector further boosts the rug's resilience and appearance.

SHIMMER II 102044-0006

When first installed, a Creative Rug may shed excess fibres, a natural trait of rugs made from natural fibres, as some fibres are not fully bound during spinning. Regular vacuuming will minimise shedding over time.

Product warranty

3 year product warranty for Creative Rugs for public spaces from Almedahls Solutions

Almedahls is a leading player in the market for textile products for public spaces with headquarters and a manufacturing base in Kinna, Västra Götaland, Sweden. Our products are manufactured using sustainable raw materials and in a sustainable process and are moreover especially developed for use in public spaces. Our product warranty means that our carpets are durable in relation to normal use in a public environment for a minimum of 3 years.

Normal use implies that the products are used under conditions which are customary for public spaces and our warranty applies provided that:

- The rug(s) are used in areas of a space and with a traffic load the rug is developed to handle according to our instructions and guidelines.
- Our care instructions are adhered to.

Almedahls is not responsible for damage or loss which occurs as a result of incorrect or unusual application of the products and our warranty is limited to replacement of our textile products.

Almedahls' warranty does not cover:

- General wear and tear due to daily use.
- Any indirect damage or loss. In addition, we are not responsible for any use or application of the products outside our guidelines, such as related to installation, violent use, change or impact of the products, soiling, etc.
- Any discrepancies between colour perception from screen monitor, or other digital representation, to physical samples or finished rugs.

We urge our customers to conduct a thorough check of products at the time of delivery. Unless otherwise explicitly agreed in writing, the deadline for raising product issues/claims is 6 months after the delivery date for the products.

We are making you aware that a rug must always be stored horizontally due to the dimensional stability of the rug.

At Almedahls, we are proud of our quality. In all matters, we strive to maintain high customer satisfaction. Regardless of our product warranties and product specifications, we therefore hope that you will contact us promptly if we do not meet your expectations.

Understanding our traffic levels

High Traffic

For areas with intense use and high durability demands.

Examples: Hallways, public offices, hotel lobbies, and busy retail environments.

Frequent Traffic

For spaces with regular use and steady foot traffic throughout the day.

Examples: Entrances, reception areas, office spaces, hotel lounges and restaurant areas.

Moderate Traffic

For spaces with moderate use where durability remains essential.

Examples: Hotel rooms, meeting rooms and lounge areas in offices or private homes.

Light Traffic

For low-use areas with minimal wear and tear.

Examples: Bedrooms, private offices and quiet seating areas.
