WABI 102100

WABI offers a more grounded, tactile expression and a greater sense of privacy than an open sheer. Its bouclé yarn is twisted from seven threads in harmonised shades and held by fine warp threads in a subtle grid. Despite its structured surface, the fabric remains lightweight and fluid, with a soft, natural drape that gently filters daylight while keeping contours and movement visible.

Part of The Texture Concept, WABI is designed to coordinate with the sheer ZEN, giving architects and interior designers an easy way to vary transparency within a project while maintaining a consistent material expression.

WABI is available in 10 muted, natural tones. Its melange surface combines easily with a wide range of interior colours, supporting layered and more complex colour schemes. In wave curtain systems, the regular folds bring out the bouclé structure and fluid drape.
